

Smartwipes

ACMOSOL 133-616

You want...

- ... an easy application?
- ... to save costs and time?
- ... environmental friendly cleaning?

ACMOS offers an excellent solution for mould cleaning and activating parts surfaces.

Advantages:

- High cleaning power with low manual effort.
- Cost savings through extension of mould life
 - quick intermediate cleaning.
- Reduced contamination at the workplace.
- Easy to handle.

Application:

- Pull a Smartwipe out of the dispenser.
 - Wipe the mould to remove polyurethane and release agent residues.
 - Wipe the polyurethane part for surface activation to ease gluing and further processing.
- Close the dispenser after use for maximum durability.

Some examples:

Integral skin foams, steering wheels, window encapsulation

Please check material compatibility before use!
